

Pro Tools Keyboard Shortcuts For Macintosh Systems

For increased operational speed and ease-of-use, there are many Pro Tools keyboard shortcuts to give you fast access to a wide variety of tasks. *This guide details the many keyboard shortcuts that are not shown within Pro Tools menus.* The shortcuts are grouped by functional area for your added convenience and quick reference.

GLOBAL KEYBOARD COMMANDS

Change all audio channel stripsoption - applicable function

Change audio channel strip and all selected

audio channel stripsoption - shift - applicable function

applicable functions:

- automation mode
- record, solo and mute enables
- record and solo safes
- volume/peak indicator
- track heights
- playlist enables
- creating Plug-Ins instances
- I/O, Bus, Send assignment
- extend selection
- clear clip meter

Toggle item & set all others to same new stateoption - click on applicable item

Toggle item & set all others to opposite state⌘ - click on applicable item

applies to:

- tracks in Show/Hide Tracks List
- Group enables/activation
- Automation Enable window
- memory location parameters

Fine Tune⌘ - click on control slider/pot/breakpoints

applies to:

- Plug-In parameter editing
- fader movement
- scrubbing
- automation data trimming (requires larger track view for highest resolution)

MIX AND EDIT GROUPS

Temporarily isolate channel strip from Group operationhold down control - any operation that affects Groups

New Group⌘ - G (with two or more tracks selected)

Suspend/Resume all Groups⌘ - shift - G or ⌘ - click on Groups pop-up menu

Rename Groupdouble-click to far left of group name in the Groups List

Group Enable/Disabletype ID letter on keyboard (To enable keyboard selection of
Groups, click box at top right of Groups List)

Hide all TracksClick on track symbol in Show/Hide menu

Show Group members onlycontrol - click on group(s) in Groups List
(control - shift - click for multiple groups)

Grouping affects:

- volume level/faders
- solos and mutes
- automation modes
- track display format
- track height
- editing
- playlist enables

Grouping does not affect:

- record enables
- pan
- voice and output assignments
- creating instances of TDM Plug-Ins

R E C O R D A N D P L A Y B A C K

Open New Track Dialog ⌘ - shift - N
In New Track Dialog cycle through track type ⌘ - </>
Cycle up/down through New Track options ⌘ - \uparrow/\downarrow
Start record ⌘ - spacebar/F12
Stop record spacebar
Stop record and discard take ⌘ - period key
Start/stop playback spacebar
Half-speed record ⌘ - shift - spacebar
Half-speed playback shift - spacebar
Pause (pre-prime deck for instant playback) option - click on Transport play button
Pause (pre-prime deck for instant record) option - click on Transport play button during recording
Enable/disable online record ⌘ - option - spacebar
Enable/disable online playback ⌘ - J / option - spacebar
Toggle record modes (normal/Destructive/Loop/QuickPunch) control - click on Transport record button
Loop playback toggle ⌘ - shift - L or control - click on Transport play button
Record-safe track ⌘ - click on Record enable button
Solo-safe track ⌘ - click on Solo button
QuickPunch ⌘ - shift - P
Enter/Exit record during playback in QuickPunch ⌘ - spacebar/click Transport record button
Set and enable pre/post-roll time option - click with selector before/after selection
Disable pre/post-roll time option - click within selection closer to front/back
Scroll to selection start/end \leftarrow/\rightarrow (when selection exceeds window view)
Toggle Transport Master (Pro Tools/Machine/MMC) ⌘ - \

A U D I T I O N I N G

When Transport = Pro Tools:

Play by pre-roll value up to selection start/end option - \leftarrow/\rightarrow
Play by post-roll value after selection start/end ⌘ - \leftarrow/\rightarrow
Play by pre & post-roll value through selection start/end ⌘ - option - \leftarrow/\rightarrow
Play by pre-roll value to current location counter time option - \leftarrow/\rightarrow (when no selection)
Play by post-roll value from current location counter time ⌘ - \leftarrow/\rightarrow (when no selection)

When Transport = Machine/MMC:

Cue transport to selection start/end ⌘ - \leftarrow/\rightarrow
Cue transport with pre/post-roll to selection start/end option - \leftarrow/\rightarrow

S C R U B (J O G) / S H U T T L E

Temporary scrub mode when using Selector control - click - drag
Extend selection while scrubbing shift - click - drag w/ Scrubber, (also in temporary scrub mode)
Shuttle option - click - drag w/ Scrubber, (also in temporary scrub mode)
Shuttle-lock control - number key (1-9, where 5 = real-time, 9 = max speed)
Change direction during Shuttle +/- (eg. shuttle backward = control - number key - minus key)
Shuttle-lock stop 0 (press number key to resume shuttle)
Exit Shuttle-lock mode spacebar or ⌘ - period key

EDIT SELECTION DEFINITION AND NAVIGATION

Locate play/edit cursor to next region-boundary/sync point tab
Locate play/edit cursor to previous region-boundary/sync point..... option - tab
Go to and select next region..... control - tab
Go to and select previous region..... control - option - tab
Extend selection to next region-boundary shift - tab
Extend selection to previous region-boundary option - shift - tab
Extend selection to include next region control - shift - tab
Extend selection to include previous region..... control - option - shift - tab
Return to start of session..... return
Go to end of session..... option - return
Extend selection to start of session..... shift - return
Extend selection to end of session option - shift - return
Set selection start/end during playback ↓/↑
Set selection start/end to incoming time code while stopped..... ↓/↑
Select entire region in Edit window..... double-click with Selector
Select entire track in Edit window..... triple-click with Selector / ⌘ - A
Extend selection to a memory location..... shift - period key - mem loc number - period key*
Place play/edit cursor or create selection across all tracks option - click in Rulers
Extend play/edit cursor or selection across all tracks enable "All" Edit group (! key) and shift - click on any other track (*To enable keyboard selection of Groups, click  box at top right of Groups List*)

EDITING, NUDGING & TRIMMING

(+/- key usage is on numeric keypad only)

Change Grid value..... control - option - +/−
Change Nudge value..... ⌘ - option - +/−
Nudge selection or region right/left by Nudge value +/−
Nudge data within current region to right/left by Nudge value
(keeps region start/end and moves underlying audio) control - +/−
Nudge left selection boundary right/left by Nudge value..... option - shift - +/−
Nudge right selection boundary right/left by Nudge value..... ⌘ - shift - +/−
Nudge back/forward by next Nudge value see Command Focus Mode section of this guide
Trim left edge of region to right/left by Nudge value option - +/−
Trim right edge of region to right/left by Nudge value ⌘ - +/−
Reverse Trimmer direction when trimming region option - Trimmer
Trim up to, but not over, adjacent regions..... hold down control key while trimming
Duplicate region(s) in Edit Window option - click selection and drag to destination
Delete selection in Edit Window playlist..... delete
Constrain audio region to vertical movement control - move audio region with Grabber
Snap region start to stationary playhead or edit selection start control - click new region with Grabber
Snap region sync point to stationary playhead or edit selection start... shift - control - click new region with Grabber
Snap region end to stationary playhead or edit selection start..... ⌘ - control - click new region with Grabber
